

Grassroots Herd Check services will help you to achieve more.

Any recorded herd can have their data processed via the Grassroots Herd Check software. This will categorise cows in the herd and allow specific advice to be given on managing herd health. Reports are generated every month with simple action plans.

PLEASE NOTE: All sections must be complete before submission

Interested in receiving a Grassroots Herd Check report based on your farm's data?

Please complete the details below about your farm and your vet practice in **BLOCK CAPITALS**. This information is needed to allow Grassroots reports to be produced based on your farm records.
